BERKSHIRE COUNTY BOARDS OF HEALTH ASSOCIATION

October 3, 2016

Dear Septic Installers,

BCBOHA is pleased to announce its Certified Septic Installer Fall/Spring 2016/17 courses. As many of you may know, BCBOHA recertification courses are now coordinated by Allison Hope. Please feel free to contact Allison with any questions at ahope@berkshireplanning.org or (413) 442-1521, x36. Please note that BCBOHA is currently located in the Berkshire Regional Planning Commission (BRPC)'s offices, so don't be concerned by the initial message when you call.

Taking an approved class extends your septic installer certification through March 2018. If your Installer's Card is more than 3 years out-of-date, you may have to re-take the New-Certification Course, offered in February 2017. If you missed renewing our Installer's Certification last year, you may take two classes this year. If you missed two years, you will need to take 3 classes. If you have any questions about your status, you can check online, email or call us. You must either attend a Recertification Course through BCBOHA or provide documentation that an alternative approved course was attended and pay the recertification fee every year in order to maintain your Septic Installer Certification. This flyer and information on these and other classes can be accessed anytime on our website, www.bcboha.org. Please note that you should enter the entire website address into your search bar (www.bcboha.org) rather than just searching for BCBOHA, as older documents sometimes come up in the search otherwise. All information on the actual website should be up to date.

The fees for classes remain the same as in previous years: \$40 for recertification and \$145 for the New Certification Course. For the first time, BCBOHA will be using an on line registration program called Eventbrite for all classes. The link to Eventbrite for each course is located on the next page. You may either pay by credit card on Eventbrite, or you may indicate that you plan to pay by check (use the pull down menu under payment & click other options, then pay by check). If you are paying by check, it must be mailed to us prior to the class, payable to BCBOHA, at 1 Fenn St, Suite 201, Pittsfield, MA 01201. If you are unable to access Eventbrite or are having trouble registering, please contact Allison to walk you through the process.

We ask that you **submit your registration at least one week prior to the class** for which you are registering. All registrations must be done through Eventbrite. We will be handing out cards at the time of the class rather than mailing them out as in previous years, so due to limited space and the need to print cards ahead of time, walk-ins will no longer be accepted. **If you don't have enough time to mail in your registration, please call 413-442-1521 x 36 and leave a message or email ahope@berkshireplanning.org and let us know you plan to attend.** Use Eventbrite to register for all courses sponsored by BCBOHA. The link needed to access Eventbrite is listed after each course on the next page (note that it is different for each class). Use the Recertification Credit Request form included in this letter to submit documentation of attendance at a non-BCBOHA course.

BERKSHIRE COUNTY BOARDS OF HEALTH ASSOCIATION

Not sure if you are currently certified? Check our website: (www.bcboha.org), send us an email: (ahope@berkshireplanning.org), or call our new office number at 413-442-1521 x 36. Once your request has been received and processed, a new certification card will be sent if you did not receive it the night of the class. Please allow two weeks before contacting us to check on your request. We will update the current Installer's list on our website after each class.

Once again, for the convenience of our installers who are also certified through NEIWPC as soil evaluators or system inspectors, we will be applying for continuing education credits (TCHs) through NEIWPC. We expect, but cannot guarantee, that 2 TCH will be awarded for each class. If you are looking for SE or SI credits, you will receive documentation of attendance the night of the class. Please note that you must still provide copies to NEIWPC – BCBOHA is not affiliated with NEIWPC in any way. If you not also a certified septic installer, you may still attend the class for SE/SI credits, as long as you register ahead of time. If you are attending only for SE/SI credits we suggest calling us ahead of time to ensure that the approval for credits has been received.

If you have ideas or requests for training classes next season, let us know and we will try to arrange an appropriate training. We look forward to serving Boards of Health and you the professionals who help ensure the requirements of the Title 5 code are met using best practices and products.

Sincerely,

Allison Hope

Installer Recertification Credit for Non-BCBOHA courses

At the request of many installers and boards of health, we are highlighting several online trainings that are suitable for recertification. **You may only use an online course or an approved course from another provider every two years**, meaning that if you took an online training last year, you must take an in-person training this year. In order to receive credit for a **non-BCBOHA course**:

- Fill out the form below
- Attach a photocopy of the course participation certificate (or some other piece of information that verifies you attended a course—ex. contact information from the instructor so we can verify your attendance, etc.)
- Attach a \$40.00 check made out to BCBOHA
- Send all these materials to: BCBOHA, 1 Fenn St. Ste. 201, Pittsfield, MA 01201

APPROVED ONLINE COURSES

Wastewater and Title 5

This module focuses on the on-site treatment and disposal of wastewater with total design flows less than 10,000 gallons per day (gpd). Large on-site systems (> 10,000 gpd), sewer systems, and certain industrial and agricultural wastewater have unique contaminants and concerns and their own set of regulations generally enforced by the Massachusetts Department of Environmental Protection (MassDEP). The State Environmental Code (310 CMR 15.000), commonly referred to as Title 5, specifies the requirements for siting, constructing, inspecting, upgrading, and/or expanding on-site systems and for transporting and disposing of septage. **To take this online training**, click or go to: <http://www.masslocalinstitute.org/?p=2222>

Presby Environmental: Enviro-Septic Wastewater Treatment

Liquid that exits from a septic tank (effluent) contains suspended solids that cause other types of leaching systems to fail. Solids overload bacteria, cut off aeration required for bacterial activity, and seal the underlying soil. This wastewater treatment system retains solids in its pipe and provides multiple bacterial surfaces to treat effluent prior to its contact with the soil. **To take this online training**, click or go to: <http://presbyeco.com/classes-certifications/ma-classes-and-certifications/>

If you want to use another course or class, please send us details so we can review the materials/class.
